In this series, we will begin with the very basics of shader development: What is a Shader, what are its components, how they are executed by the hardware, what is rendering pipeline and what does it look like and then we will move towards further concepts like pattern creation, animation in shaders and then we will explore the whole world of lighting in shaders.

Shader Development using Unity | ShaderDev

A shader's sole purpose is to return four numbers: r, g, b, and a. That's all it ever does or can do. The function you see in front of you runs for every single pixel on screen. It returns those four color values, and that becomes the color of the pixel. This is what's called a Pixel Shader (sometimes referred to as a Fragment Shader).

A Beginner's Guide to Coding Graphics Shaders

The Ultimate Guide to Game Development with Unity is the perfect way to get your feet wet. In this online course, you'll gain the foundational skills you need to make 2D and 3D games. In this online course, you'll gain the foundational skills you need to make 2D and 3D games.

Unity Learn

Some of the shaders I did for Project Create that went on top of the work from the fun team of Magic Leap Studios. My aim was to give life to some of the static meshes while increasing user interaction and enjoyment without incurring too much of a performance hit. Much of the work was done by pushing data to the GPU and having the vertex shader calculate. Concepting: Danielle Brown, Cara Khan ...
