Snort is actually more than an intrusion detection tool. It's also a packet sniffer and a packet logger. But what we're interested in for now is Snort's intrusion detection features. Somewhat like a firewall, Snort is configured using rules. Base rules can be downloaded from the Snort website and customized to your specific needs.

Best FREE Intrusion Detection Software in 2020

tuning an Intrusion Detection System or Intrusion Prevention System (IDS/IPS). The proper configuration of an IDS is a bit of an art because there are so many different ways to do it. I have seen and listened to many people explain the best way to configure a detection engine and while I don t subscribe to a best way, I

SANS Institute Information Security Reading Room

An IDS is an intrusion detection system and an IPS is an intrusion prevention system. While an IDS works to detect unauthorized access to network and host resources, an IPS does all of that plus implements automated responses to lock the intruder out and protect systems from hijacking or data from theft.
